Brushless Motors

BLV Series R Type

Modular Automation Compatible Products

**Battery-Operated, Compact, and Lightweight
Brushless Motors in the Era of Advancing
Automation**

NEW

60 W/100 W/200 W/400 W

DC Input

NEW

High-Power, Compact Brushless Motors. Developed to Support the Design of Compact, Battery Driven Automation.

- Output: 60 W, 100 W, 200 W, 400 W
- Power Supply Input: 24 - 48 VDC*1
- Electromagnetic Brake Type Also Available

*1 400 W type is 48 VDC

What are "Modular Automation Compatible Products"?

"Modular Automation Compatible Products" is a product group with a shared concept of battery-operated, compact, and lightweight. Optimal for self-propelled equipment, these products meet the needs of flexible automation lines and mobile automation.

Modbus (RTU)

CANopen

Driver

NEW CS Geared Motor

Compact, Lightweight, and High-Power Designed for Compact Equipment

- Compact and lightweight driver
When connected to a motor, recognizes the output and covers all output with a single driver.

- Transportation robots for flat, transportable masses can be designed

Compatible with Modbus (RTU) and CANopen Communication

- Unified controllability of transportation robots, conveyors and other mechanisms

• Conveyor Drive Motor (60 W CS geared motor)

Smooth Motion, Current Position Acquisition and Positioning Operation are Possible

A Wider Range of Operating Voltage Supports Real World Battery Use

Application: Autonomous transportation robot with belt conveyor

Various Applications

Transportation Robots

Transportation robots with a low floor design

Parallel Shaft Gearhead

Hollow Shaft Flat Gearhead

Support from Startup and Operation to Maintenance with the Support Software MEXE02

Support Software **MEXE02**

Agitators

Agitate at a stable speed, even if the viscosity (load) changes

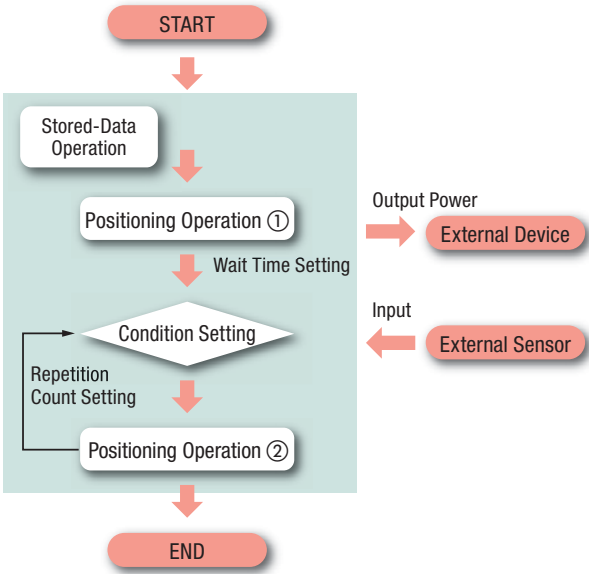

Conveyors

A broad range of speed control from low to high speed

Simplified Main Program Thanks to Sequence Function

Security Cameras

Quiet drive
Compact driver

Designed for Compact Equipment

Compact and Lightweight

Both the motor and driver are significantly smaller and lighter.

The driver is approximately 80% smaller than the conventional product. The smaller driver saves valuable space in the automation equipment.

● Motor*

*For a 400 W parallel shaft gearhead at a gear ratio of 30

● Driver

Powerful

The new motor allows for larger inertia loads and heavier products to be transported when compared to the conventional product. This also contributes to compact, high-power equipment design.

[Example of the design of a transportation robot]

● Conditions

BLV Series R Type Motor	Product Line	Hollow Shaft Flat Gearhead
	Output Power	400 W
	Gear Ratio	30
Driving Conditions	Vehicle Diameter	150 mm
	No. of Drive Wheels	2
	Acceleration Time	1 second

● Results

Max. Load Mass (Transportation robot mass + Load mass)	500 kg
Maximum Traveling Speed	0.7 m/sec

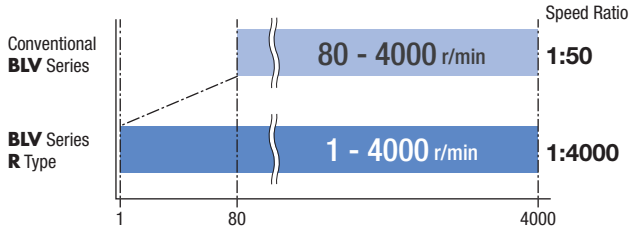

*The friction coefficient of the wheels is calculated at 0.1.

Wide Speed Range, Smooth Motion, Current Position and Position Feedback is Possible

Broad Speed Control Range of 1 - 4000 r/min

Smooth startup and stopping is possible thanks to stable operation even in the low speed range from 1 r/min.

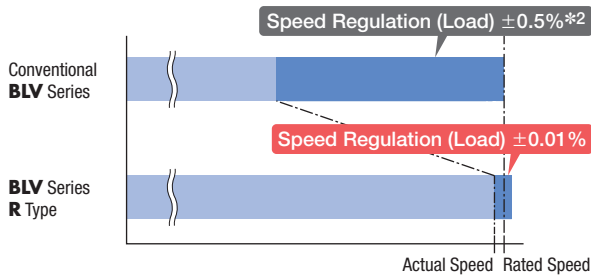

Benefit

•Smooth travel is possible, even with repeated start and stop operations.

High Speed Stability when Operated at High Speed

Operation at the set speed is possible even with the load fluctuation due to the speed regulation (load*1) of $\pm 0.01\%$.

*1 Rate of change in speed when a constant load is applied

$$\text{Speed regulation} = \frac{\text{Actual speed} - \text{Command speed}}{\text{Command speed}} \times 100 (\%)$$

*2 $\pm 0.2\%$ for digital settings

Acquisition of Current Position and Positioning Operations are Possible

The current position can be acquired with enhanced motor feedback information. Improved resolution allows the motor to stop at the target position.

Improved Resolution Ensures
More Accurate Positioning Operations

●The stopping accuracy during positioning operation is $\pm 0.72^\circ$ on the motor shaft and around $1 - 2^\circ$ on the gearhead output shaft.

A Wider Range of Operating Voltage Supports Real World Battery Use

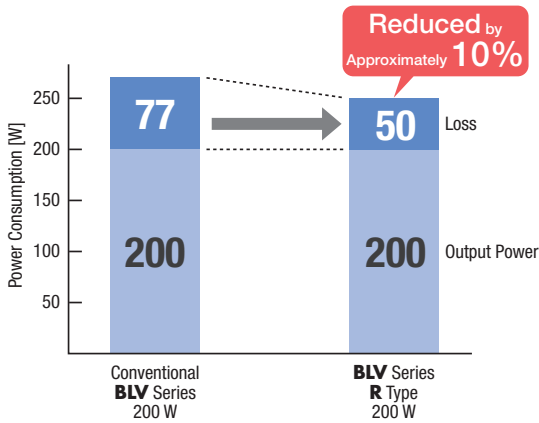

Wider Range of Operating Voltage

Benefit

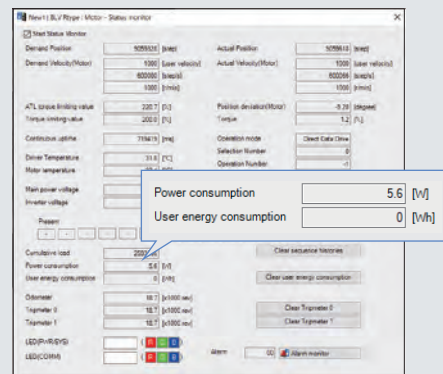

- Compatible with 24 - 48 VDC batteries.
- Will not stop even if the battery voltage drops. Continues operating while limiting the speed and torque.
- The driver's overvoltage alarm threshold is 63 VDC.
- *400 W type is 48 VDC, operating voltage range is 30 - 55 VDC.

Power Consumption Reduced by 10%

Benefit

- Extended travel distance and time for transportation robots. The number of battery charges can also be decreased.
- Power consumption can be monitored via the Support Software **MEXE02** and communication. This is useful as charging reference.

Various Recommended Functions

Holding when Stopped is Possible without an Electromagnetic Brake

When the motor has stopped in an excitation state, it can be used as an electrical holding brake, even without a mechanical brake. The motor enters an excitation state when the input signal "S-ON" is turned ON, and generates holding force. (Servo ON) When the input signal "PLOOP-MODE" is turned ON, the position can be held with no deviation from the stop position.

Note

If the power supply to the driver is turned OFF, the holding force dissipates. This cannot be used to prevent a fall during a power outage.

ATL Function that Automatically Limits Output Torque

The ATL function limits torque and ensures that the motor does not stop when an overload alarm occurs, even when torque continues to be output at a level at which an overload alarm is detected.

The motor will continue driving, even if an unexpected overload occurs*.

* Examples)

- Runs into an obstacle
- Sudden acceleration command
- Carrying a load exceeding the transportable mass

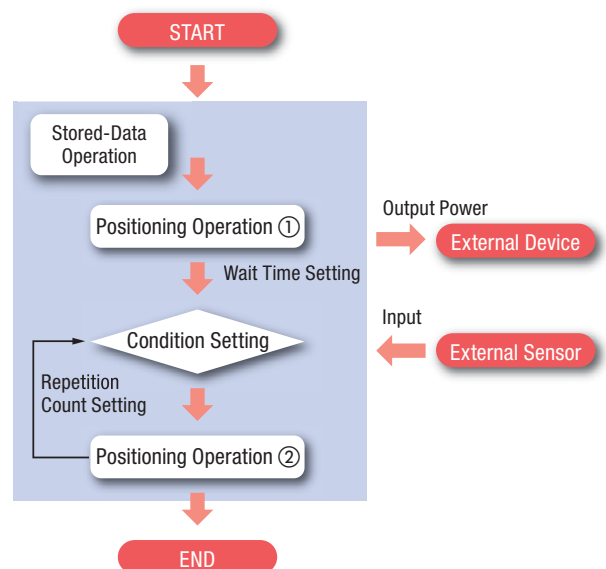

● Please disable the ATL function if the motor should stop when an alarm is output during overload.

Simplified Main Program Thanks to Sequence Function

Can be used during stored-data operation, and comes with many sequence functions such as a timer setting for between operations and linked operation, conditional branching, and loop count. These help simplify the host system's sequence program.

- Stored-data settings (max. 256)
- Direct I/O (4 inputs, 2 outputs)
- Remote I/O (32 inputs, 32 outputs)

Compatible with Modbus (RTU) and CANopen Communication

The **BLV Series R** Type is compatible with the two interfaces of Modbus (RTU) and CANopen communication.

Main Functions with Modbus (RTU)

● Freely Create Operation Profiles - Direct Data Operation

With Modbus (RTU) communication, data can be rewritten and operations can be started at the same time.

● Types of Operating Data

Operating Modes	Sets the operating mode.
Position	Sets the target position.
Speed	Sets the operating speed.
Acceleration Rate	Sets the acceleration time.
Deceleration Rate	Sets the deceleration time.
Torque Limiting Value	Sets the torque limiting value.

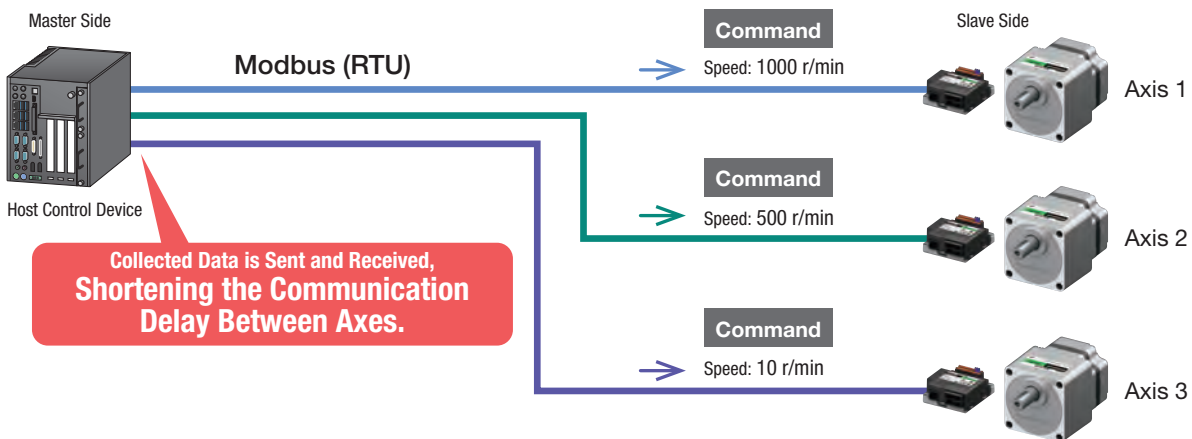

● Gather, Send, and Receive Data Across Different Axes - ID Share Mode

This function improves synchronization between axes with Modbus (RTU) communication.

Data collected from multiple axes can be sent and received, shortening the communication delay between axes.

It can also be used to send different commands to each axis at the same time.

This transmission method is unique to Oriental Motor.

Support from Startup and Operation to Maintenance

with the Support Software **MEXE02**

By using the Support Software **MEXE02**, data setting, actual operation, and confirmation via each monitor can be performed easily on a computer. The support software can be downloaded for free from the Oriental Motor website.

→ https://www.orientalmotor.co.jp/download/software/mexe02_function/

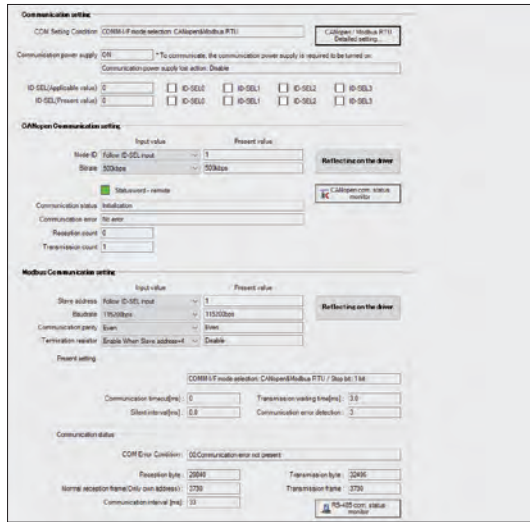

Support Software
MEXE02

Startup Functions that Support Programming at Setup

● Simple Settings

Various communication settings can be easily made using the "Simple communication settings".

● Communication Frame Monitoring, Communication Status Monitoring

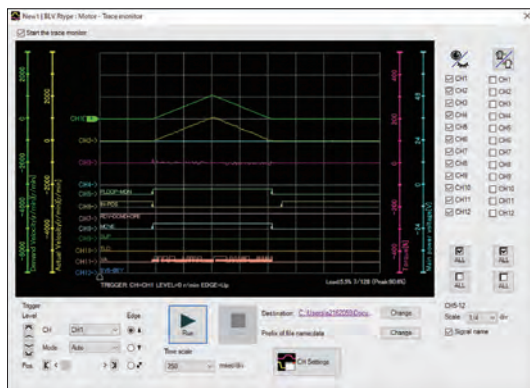

All communication frames and statuses can be monitored. This is useful for host program startup and debugging.

Operation Functions that Support Adjustments

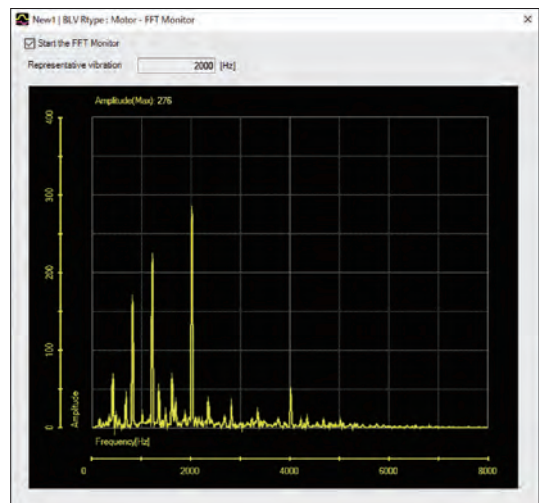

● Waveform Monitoring

The operating status of the motor (command speed, torque, I/O signal, etc.) can be checked like an oscilloscope. Waveform measurement results can be saved as images and in CSV format.

● FFT Monitoring

Visualizes mechanical resonance by analyzing frequency using FFT analysis. Noise and vibration can be reduced by adjusting the "Resonance suppression parameter".

● Gain Tuning

Motor tracking can be adjusted according to the command.

Maintenance Functions that Support Diagnostics and Maintenance

Trace Monitoring

The operating status of the motor can be continuously measured for 24 hours or longer. Data can be saved in CSV format.

Merit

Data is saved for a long period of time, making it easy to determine the cause of a problem.

Various Monitoring Functions

The Support Software **MEXE02** can also monitor various other types of information. For details, please see the Oriental Motor website.

Gearheads that Contribute to Space Saving Design

Higher Torque and Space Saving are Achieved with a Hollow Shaft Flat Gearhead

Permissible Torque with no Saturation

No saturation of permissible torque even at high gear ratios. This is useful for maximizing the motor torque.

*When frame size is 90 mm

Space Saving and Cost Reduction

Direct connection to the drive shaft is possible without using a connecting part, which enables equipment space saving. The reduction in couplings, belts, pulleys, etc. also contributes to a decrease in the cost of parts and assembly work.

Example) Application in vehicle drive part Staggered for a compact configuration.

*Compatible with all types except 100 W

CS Geared Motor (60 W type) Makes Equipment Smaller and Lighter

CS geared motors feature increased load capacity, upgraded torque, and coaxial shaft.

Contributes to Space Saving and Lighter Equipment

Gear Structure with Coaxial Shaft

Large gears are arranged such that they will not escape from the central shaft, creating a gearhead with a coaxial shaft.

Product Line

Different motors, gearheads and cables are available based on the system requirements.

● Motors

	400 W	-	200		300		400		

*1 The gear ratio of **100** is compatible with the 60 W type, 100 W type, and 200 W type.

*2 The output shaft speed is the speed divided by the gear ratio.

*3 The maximum permissible inertia when the deceleration time is set to 0.1 seconds or higher. Please set the acceleration time so that the torque needed for acceleration/deceleration does not exceed the maximum instantaneous torque.

*4 Also applicable when the deceleration time is set to below 0.1 seconds.

● The values correspond to each specification and characteristics of a stand-alone motor.

A number indicating the gear ratio is specified where the box □ is located in the product name.

The letter **F** or **B** indicating the cable output direction is specified where the box ■ is located in the product name.

Electromagnetic Brake Motor → Pages 38 and 39

Driver → Page 40

Common Specifications

Item	Specifications
Input Signals	4 points, Photocoupler Input Mode
Output Signals	2 points, Photocoupler and Open-Collector Output
Main Operation Functions	Continuous Operation, Positioning Operation, JOG Operation, Return-to-Home Operation
Operating Data Setting Number	256 Points
Setting Tool	Support Software MEXE02
Maximum Extension Length	Motor and Driver Distance: 3.5 m* (when a connection cable sold separately is used)

*3.0 m for the 60 W type.

Communication Specifications

Power Supply for Communication

Power Supply Current Capacitance	Input Power Supply Voltage
0.2 A min.	24–48 VDC

RS-485 Communication Specifications

Electrical Characteristics	Complies with EIA-485. The maximum total extension length of the communication cable is 10 m when using twisted-pair wires. *
Communication Mode	Half duplex Start-stop synchronization (data: 8 bits, stop bit: 1 bit or 2 bits, parity: none, even, or odd)
Baud Rate	Select from 9,600 bps, 19,200 bps, 38,400 bps, 57,600 bps, 115,200 bps, and 230,400 bps (initial value)
Protocol	Modbus RTU Mode
Connection Type	Up to 31 units can be connected to a single host system.

*If noise generated by the motor cable or power supply cable causes a problem with the specific wiring or layout, shield the cable or use ferrite cores.

CANopen Communication Specifications

Electrical Characteristics	ISO 11898-compliant Use a CAN-BUS cable.
Communication Protocol	CANopen
Communication Profile	CiA DS301 Version 4.2.0-compliant
Device Profile	CiA DSP402 Version 4.0.0-compliant
Node ID	1 - 127
Bit Rate	Select from 1 Mbps, 800 kbps, 500 kbps (initial value), 250 kbps, 125 kbps, 50 kbps, 20 kbps, and 10 kbps
Max. Bus Length	25 m (Max. bus length at 1 Mbps)
Communication Objects	NMT (Network Management) SDO (Service Data Object: 1 SDO server) PDO (Process Data Object: 4 Receive-PDO, 4 Transmit-PDO) EMCY (Emergency Object) SYNC (Synchronization Object)
Operation Modes	Profile velocity mode (pv) Profile position mode (pp) Homing mode (hm)

General Specifications

Item	Motor	Driver
Insulation Resistance	100 MΩ or more when a 500 VDC megger is applied between the windings and the case after continuous operation*1 under normal ambient temperature and humidity.	100 MΩ or more when 500 VDC megger is applied between the heat sink and the main power supply input terminal after continuous operation under normal ambient temperature and humidity.
Dielectric Strength	Sufficient to withstand 0.5 kVAC at 50 Hz applied between the windings and the case for 1 minute after continuous operation*1 under normal ambient temperature and humidity.	Sufficient to withstand 0.5 kVAC at 50 Hz applied between the heat sink and the main power supply input terminal for 1 minute after continuous operation under normal ambient temperature and humidity.
Temperature Rise	The temperature rise of the windings is 60°C max. and that of the case surface is 50°C max.*2, measured by the thermocouple method after rated continuous operation*1 under normal ambient temperature and humidity.	The temperature rise of the heat sink is 50°C max., measured by the thermocouple method after rated continuous operation under normal ambient temperature and humidity.
Operating Environment	Ambient Temperature	0 - +40°C (Non-freezing)
	Ambient Humidity	85% max. (Non-condensing)
	Altitude	Up to 1000 m above sea level
	Atmosphere	No corrosive gases or dust. Should not be exposed to oil. Cannot be used in a radioactive area, magnetic field, vacuum, or other special environments.
Vibration	Not subject to continuous vibration or excessive shock In conformance with JIS C 60068-2-6, "Sine-wave vibration test method" Frequency Range: 10 - 55 Hz, Half Amplitude: 0.15 mm Sweep Direction: 3 directions (X, Y, Z) Number of Sweeps: 20 times	
Storage Condition*4	Ambient Temperature	-20 - +70°C (Non-freezing)
	Ambient Humidity	85% max. (Non-condensing)
	Altitude	Up to 3000 m above sea level
	Atmosphere	No corrosive gases or dust. Should not be exposed to water or oil. Cannot be used in a radioactive area, magnetic field, vacuum, or other special environments.
Thermal Class	UL/CSA Standards: 105 (A), EN Standards: 120 (E)	—
Degree of Protection	IP40	IP20

*1 30 minutes rating for the 400 W type

*2 For the round shaft type, install on a heat sink (material: aluminum) of the following size so that the surface temperature of the motor case does not exceed 90°C.

60 W type: 135×135 mm, thickness 5 mm, 100 W type: 165×165 mm, thickness 5 mm, 200 W type: 200×200 mm, thickness 5 mm, 400 W type: 250×250 mm, thickness 6 mm

*3 Install the driver to a location that has the same heat radiation capability as an aluminum metal plate.

200×200 mm, thickness 2 mm

*4 The storage condition applies to short periods such as the period during transport.

Note

● Do not measure insulation resistance or perform a dielectric strength test while the motor and driver are connected.

Dimensions (Unit = mm)

- Check "Included" for the products that include the installation screws.

Included → Page 16/Installation Screw Dimensions → Page 41

- A number indicating the gear ratio is specified where the box □ is located in the product name.

The letter **F** (output in the side of the output shaft) or **B** (output in the opposite side of the output shaft) indicating the cable output direction is specified where the box ■ is located in the product name.

Parallel Shaft Gearhead

Product Name	Gear Ratio	Installation Screws		L2 [mm]
		Type of Screw	L1 [mm]	
GFV4G □	5 - 20	M6	60	8
	30 - 100		65	8
GFV5G □	10 - 20	M8	70	11.5
	30 - 100		85	13.5
GFV6G □	10 - 20	M8	85	11
	30, 50		100	14
	100		110	10
BLMR260HK -□ CS	5 - 20	M4	60	10

- Installation screws: 4 flat washers and spring washers are included.
The material of the installation screws is stainless steel.

Hollow Shaft Flat Gearhead

Product Name	Gear Ratio	Installation Screws		L2 [mm]
		Type of Screw	L1 [mm]	
GFS4G □ FR	5 - 200	M6	70	14
GFS5G □ FR	10 - 200	M8	90	21
GFS6G □ FR	10 - 100	M8	100	13

- Installation screws: 4 flat washers, spring washers and hexagonal nuts are included.
No hexagonal nuts are included with the **GFS6G**□**FR**.

● A number indicating the gear ratio is specified where the box □ is located in the product name.

■ Calculation of Permissible Radial Load of Hollow Shaft Flat Gearhead

The permissible radial load calculation formula differs depending on the mechanism.

◇ If One Side of the Load Shaft is Not Supported by the Bearing Unit

Radial load is the most severe mechanism. The recommended load shaft is the stepped type.

F_0 [N] : Permissible radial load on flange-installation surface

L_p [mm] : Distance from flange-installation surface to radial load point

B [mm] : Distance from flange-installation surface to bearing unit

Product Name	Permissible Radial Load W [N]
GFS4G□FR	$W [N] = \frac{40}{40+L_p} \times F_0 [N]$
GFS5G□FR	$W [N] = \frac{50}{50+L_p} \times F_0 [N]$
GFS6G□FR	$W [N] = \frac{60}{60+L_p} \times F_0 [N]$

◇ If One Side of the Load Shaft is Supported by the Bearing Unit

Product Name	Permissible Radial Load W [N]
GFS4G□FR GFS5G□FR GFS6G□FR	$W [N] = \frac{B}{B-L_p} \times F_0 [N]$

Product Name	Speed	Gear Ratio	F_0 [N]
GFS4G□FR	At 1 - 3000 r/min	5, 10	1000
		15 - 200	1500
	At 4000 r/min	5, 10	910
		15 - 200	1370
GFS5G□FR	At 1 - 3000 r/min	10	1080
		15, 20	1550
		30 - 200	1800
	At 4000 r/min	10	980
		15, 20	1430
		30 - 200	1680
GFS6G□FR	At 1 - 3000 r/min	10	1430
		15, 20	1960
		30 - 100	2380
	At 4000 r/min	10	1320
		15, 20	1810
		30 - 100	2210

● A number indicating the gear ratio is specified where the box □ is located in the product name.

Cables / Peripheral Equipment (Sold separately)

Cables

● Cable System Configuration

◇ 60 W Type

◇ 100 W, 200 W, and 400 W Type

1 Connection Cables / Flexible Connection Cables

These cables are used to connect the motor and the driver.

- Keep the overall cable within 3.5 m (3.0 m for the 60 W type).
- Use the flexible connection cable in applications where the cable is bent and flexed repeatedly.

- Product Line → Page 16
- Dimensions → Page 40

2 Power Supply Cable

These cables are used to connect the driver and the DC power supply.

- Product Line → Page 16
- Dimensions → Page 40

■ Mounting Bracket for Motor and Gearhead

A convenient mounting bracket for installing and fixing parallel shaft gearheads and round shaft types.

● Product Line

Product Name	Applicable Product
SOL2M4F	BLMR260 (CS geared motor, round shaft type)
SOL4M6F	BLMR460 (Parallel shaft gearhead)
SOL5M8F	BLMR5100 BLMR5200, BLMR5400 (Round shaft type)
SOL6M8F	BLMR6200, BLMR6400 (Parallel shaft gearhead)

Note

● A hollow shaft flat gearhead cannot be used.

■ Flexible Couplings

A clamp type coupling for connecting the motor and gearhead shaft.

Couplings that can be used with parallel shaft gearheads and round shaft types are available.

● Couplings can also be used on round shaft types.

Select a coupling with the same inner diameter as the motor shaft diameter.

● Product Line

Applicable Product	Load Type	Coupling Type
BLMR460	Uniform Load	MCL40 Type
	Impact Load	MCL55 Type
BLMR5100	Uniform Load	MCL55 Type
	Impact Load	
BLMR6200 BLMR6400	Uniform Load	MCL65 Type
	Impact Load	

Orientalmotor

These products are manufactured at plants certified with the international standards **ISO 9001** (for quality assurance) and **ISO 14001** for systems of environmental management).

Specifications are subject to change without notice. This catalogue was published in January 2024.
